

# Regions Trauma – Brain Injury Guidelines

Adult Blunt Trauma Only

Repeat HCT may be required for select BIG 1 and BIG 2 patients in order to document stability to allow for early initiation of VTE prophylaxis. Please document.

**BIG 1 or 2 and BCI? – BIG Guidelines don't apply!**  
If no other contraindication to ATT, repeat HCT at 12h and start ASA 81mg (per BCI protocol) after 24h if this repeat scan is stable. Ok to discharge at 48h if no other reasons for ongoing admission. Include HCT with repeat CTA neck at 7 days (protocol for Grade 1 and 2 BCI)
